All surveys were given to the youth in the end of of training days.

Everybody filled them anonymously on paper.

One of the youth only took part on the training days and not for the sessions before.

That person can be identified because of this but we made sure they were fine with the matter.

# COMMENTS FROM THE YOUTH

## COMMENT1

"Three days is quite a short time to fabricate a big project, but it was well enough to do the most important parts. The days were fun, and I learned a lot. I even faced my fear against one machine. 5/5 and wonderful ice-creams."

## COMMENT2

"This has been a very nice experience over all. I got to feel better about myself and my skills. I felt like I wasn't judged at all and that let me go outside my comfort zone! Very good for my mental health."

## COMMENT3

"The schedule was rather tight so an extra day whould have been nice. Some of the helpers a bit intense, could have given a little more space. People were really nice and helpful!"

## COMMENT4

"First day of the event was taxing socially but enjoyed the event overall. Instructors were helpful and very supportive. I managed to make projects I had planned andI am happy with the results. I had a little bit uncertainty about my design before the event so maybe there could be a little more time for that."
